

*Arnon Rosan
President and CEO
Garrison Systems, LLC.*

Arnon Rosan, CEO of Garrison Flood Control Systems, LLC. is a New York City native, serial entrepreneur, angel investor, and tinkerer. Noticing changing weather patterns, Mr. Rosan realized that the need for flood control products would only grow. This led to the founding of Garrison Flood Control, to offer economical flood protection for homeowners, businesses and government agencies.

Garrison Flood Control has become a leading provider of flood barriers, water gates, and self deploying dams.

This isn't Mr. Rosan's first time supplying materials for disaster relief and emergencies. Prior to his involvement with Garrison, Mr. Rosan was the founder of several successful businesses in adjacent spaces. His prior business, called EverBlock, manufactures life-size modular building blocks that are used to create portable walls, furniture, and event decor. Its systems were used extensively throughout the COVID pandemic by City and State Government's to build acute care centers, converting convention centers and schools into temporary hospitals for COVID relief efforts.

While the world shut down, Mr. Rosan and the team at EverBlock were on the frontlines building pop-up medical facilities. As a result of the company's work and commitment, EverBlock won the first ever "Best Pivot Award" through Exhibitor Magazine's "Portable Modular Awards" in 2020 for its quick reaction to assist.

EverBlock was also praised for their efforts in [Forbes Magazine](#) and [Crain's Business](#), and delivered and installed nearly a year's worth of product in just one month. Mr. Rosan was presented with a "Certificate of Commendation" by New Jersey Governor Phil Murphy and Bergen County Executive, James Tedesco.

Prior to EverBlock, Arnon Rosan was the Founder and CEO of Signature Systems Group, the world's largest manufacturer of modular plastic flooring and roadway systems. Mr. Rosan designed and patented several industry leading products used by the National Guard and FEMA following Hurricanes Katrina, Ike, and Sandy. He also assisted in building temporary roadways for the United Nations World Food Program following the 2010 earthquake in Haiti. Signature also provides flooring for special events and was the chosen contractor for all modular flooring at the 2012 London Olympics. As part of Mr. Rosan's work at Signature, he received the "Department of Commerce E-Award for Exporting Excellence" and was listed in Crain's 40 under 40.

Arnon Rosan is listed on several global patents and has spoken publicly on entrepreneurship and business strategy and has appeared on multiple TV news shows. His products and companies have been featured in a wide array of publications including Forbes, Wired, Fast Company, Time Magazine, Popular Mechanics, Bloomberg News, Cheddar, Mashable and many others.

Mr. Rosan is a graduate of Cornell University (BA) and New York University (MBA) and currently lives in New York City.
